

Community Air Protection Program (AB 617)

Washington State Delegation
June 22, 2022

Overview

- ❖ **Background on the Community Air Protection Program (CAPP)**
 - *How it fits into California's broader air quality goals*
 - *How it works*
- ❖ **Progress to date and expected results over time**
- ❖ **Lessons learned and key takeaways**

Background

How it fits

Programs Before AB 617

Criteria Pollutants

Regional SIPs for NAAQS
Attainment area designations
35 Air Districts in 15 Air Basins
Districts – stationary
CARB – mobile

Air Toxics Hot Spots Program (AB 2588)

Local – Air Districts
Statewide – CARB – Air Toxic
Control Measures (ATCM)
Diesel Risk Reduction Plan

Climate Pollutants (AB 32)

Statewide GHG Targets
Cap and Trade Program

AB 617

Passed in 2017 with AB 398, which extended California's Cap and Trade Program beyond 2020

A few key requirements:

- Enhanced emissions reporting, large stationary source controls, establish databases
- **Air Monitoring**
- **Emission Reductions** (HSC 44391.2(c))
 - The programs **shall result in emissions reductions in the community**, based on monitoring or other data.
 - In implementing the program, *the district and the state board shall be responsible for measures consistent with their respective authorities.*

Community Air Protection Program

Assembly Bill (AB) 617 (C. Garcia, Chapter 136, Statutes of 2017) (HSC 44391.2(b))

...the California Air Resources Board “shall prepare, in **consultation** with the Scientific Review Panel on Toxic Air Contaminants, the districts, the Office of Environmental Health Hazard Assessment, environmental justice organizations, affected industry, and other interested stakeholders, *a statewide strategy to reduce emissions of toxic air contaminants and criteria air pollutants in communities affected by a high cumulative exposure burden.*”

Consultation Group

Photo from March 26, 2018

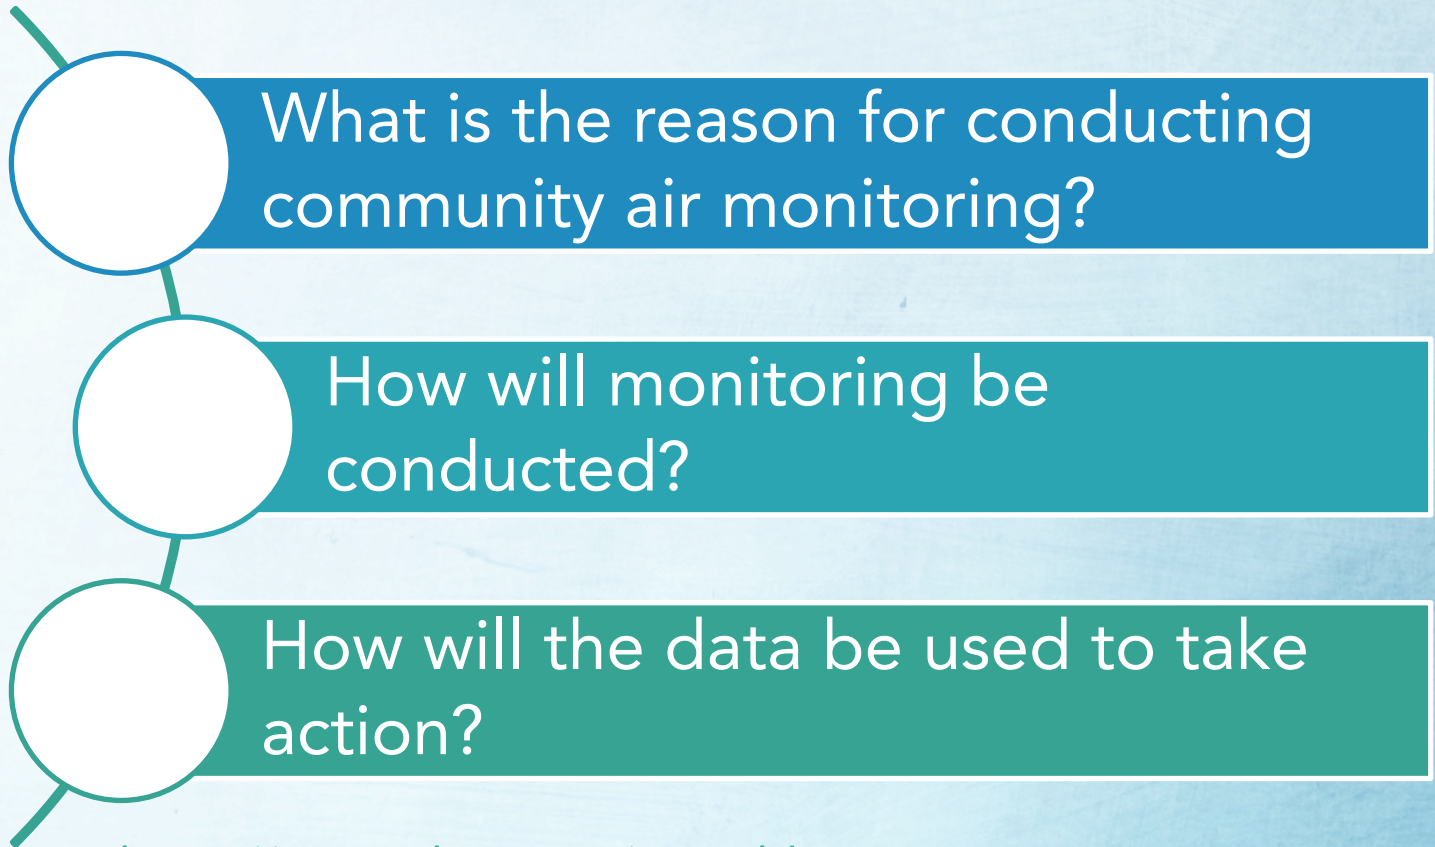

- ❖ Co-chaired by CARB Board members
- ❖ Forum for consultation with wide range of stakeholders:
 - Environmental justice organizations
 - Community Steering Committee (CSC) members
 - Air districts
 - Industry
 - Academia
 - Public health organizations
- ❖ Input on Blueprint revision in progress
 - EJ members led the development of the **People's Blueprint**
 - Technical/writing support contract

Photo from April 1, 2022

Community Air Monitoring Plan (CAMP)

Purpose: Measure air quality and characterize burdens to support action or measure progress

**APPENDIX E.
STATEWIDE AIR MONITORING PLAN**

TABLE OF CONTENTS

| | | |
|------|---|------|
| I. | INTRODUCTION..... | E-3 |
| II. | COMMUNITY AIR MONITORING PLAN ELEMENTS AND REQUIRED CRITERIA..... | E-6 |
| | What is the Reason for Conducting Community Air Monitoring?..... | E-8 |
| | Form Community Partnerships..... | E-8 |
| | State the Community-Specific Purpose for Air Monitoring..... | E-9 |
| | Identify Scope of Actions..... | E-10 |
| | Define Air Monitoring Objectives..... | E-10 |
| | Establish Roles and Responsibilities..... | E-11 |
| | How will Monitoring be Conducted?..... | E-11 |
| | Define Data Quality Objectives..... | E-11 |
| | Select Monitoring Methods and Equipment..... | E-12 |
| | Determine Monitoring Areas..... | E-13 |
| | Develop Quality Control Procedures..... | E-13 |
| | Describe Data Management..... | E-14 |
| | Provide Work Plan for Conducting Field Measurements..... | E-14 |
| | How will Data be Used to Take Action?..... | E-15 |
| | Specify Process for Evaluating Effectiveness..... | E-15 |
| | Analyze and Interpret Data..... | E-16 |
| | Communicate Results to Support Action..... | E-17 |
| III. | CHECKLIST FOR COMMUNITY AIR MONITORING EVALUATION..... | E-18 |
| IV. | COMMUNITY AIR MONITORING DATA PORTAL..... | E-21 |
| V. | RESOURCES FOR COMMUNITY AIR MONITORING..... | E-22 |

COMMUNITY AIR PROTECTION PROGRAM **E-1**

Community Emissions Reduction Program (CERP)

Purpose: Reduce emissions and exposure to poor air quality in selected community

**APPENDIX C.
CRITERIA FOR COMMUNITY EMISSIONS
REDUCTION PROGRAMS**

TABLE OF CONTENTS

COMMUNITY AIR PROTECTION PROGRAM **C-1**

Community Steering Committee (CSC)

The majority of a CSC is comprised of community residents

- Community members who live, work, or own businesses in the community

Additional members can include:

- Community-based organizations
- Local agency representatives
- Health departments
- Academic researchers

Path for CERP and CAMP development with Community Steering Committees

Nominations:
Self and by Air District

Annual Community
Selection by CARB

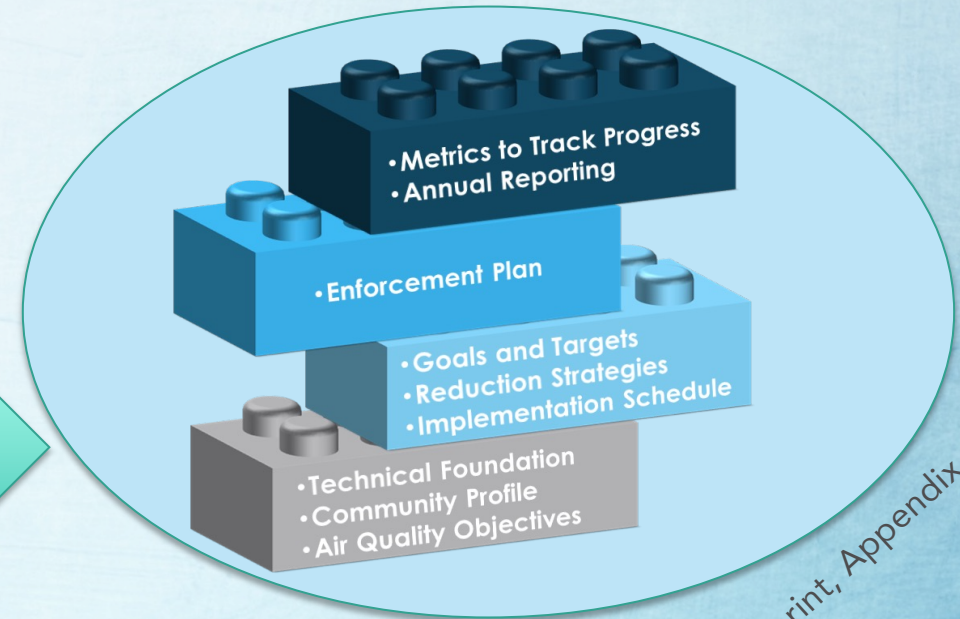

Air District Convenes
Community Steering
Committee (CSC)

CERP Timeline

- Establish boundaries, community steering committees, charter for selected communities
- Determine priorities, objectives
- Collect data & build technical foundation
- Identify reduction strategies
- Set goals and targets
- Determine metrics to track progress

Progress

CAPP Communities

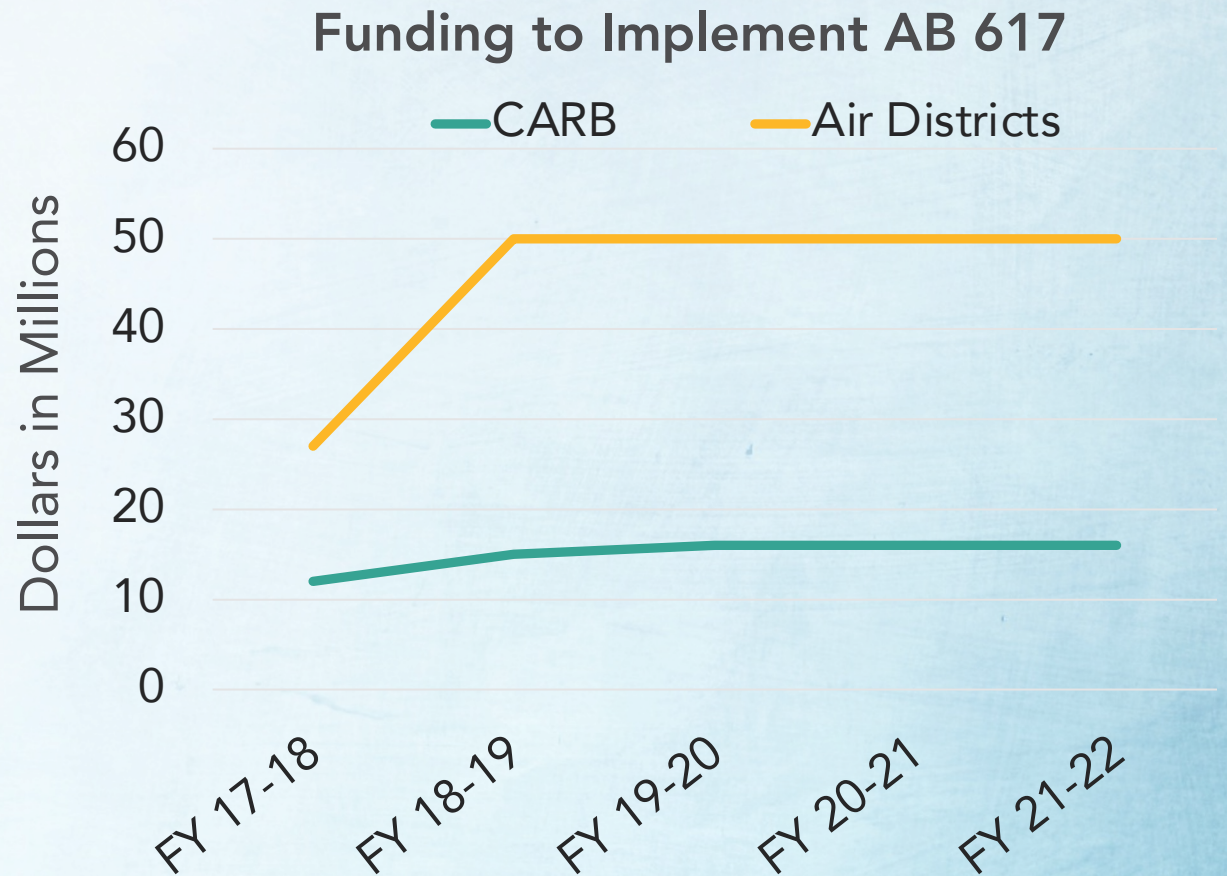

17 Communities Statewide

- All disproportionately impacted
- To gain diverse experience, the selected communities have a variety of air pollution sources and geographic characteristics
- Most communities have both a Community Air Monitoring Plan (CAMP) and Community Emissions Reduction Plan (CERP)

A Time of Transition for the Program

- 11-year commitment for each selected community
- Level funding for a growing Program
- Support expanded opportunities to convene communities as resources allow

Updating the Blueprint

Reimagining the Program

Required to update every 5 years

Reimagine the program *together* to identify new ways to support more communities

- Fund communities to write their own CERPs through Community Air Grants
- Community-focused enforcement

Update process informed by

- Robust public engagement strategy
- People's Blueprint and Consultation Group discussions
- Successes and lessons learned

Tracking Progress

- Air Districts provide progress on CERPs and CAMPs in Annual Reports
- CommunityHub dashboard to track progress
<https://ww2.arb.ca.gov/capp-communities>
- Annual Memos to CARB's Governing Board
 - Community Air Protection Program
 - Community Air Protection Incentives
- Updates on Community Air Grants

Community Air Grants Prepare Recipients to Participate in the Process

- Community-led air monitoring
- Technical training and education
- Action plans to reduce local toxic air pollution
- Increasing residents' engagement

\$25 million awarded in 2018, 2019, and 2021

Almost 100 grants awarded throughout the State

\$10 million solicitation for 2022-23

<https://ww2.arb.ca.gov/capp-cag>

Lessons Learned, Key Takeaways

Understanding the Community

Bringing partnership, collective knowledge, priorities, and data together to address shared goals

Regulatory Authorities

Bringing the right people with the necessary regulatory authority to the table

Government/Community Capacity Building

Filling knowledge gaps and improving transparency, accessibility and participation

Partner and Collaborate

Building Trust, Sharing Goals and Values, Sharing Power

Partner and Collaborate

- **Building Trust**
 - Have a plan for community engagement, preferably on their terms
 - Respect community members' time, lived experience, perspectives
 - **Listen:** History, problems, root causes, recommended solutions
 - 'We want action not to be studied again'
- **Sharing Goals and Values**
 - **Co-develop** a process for community engagement and goal-setting
 - Professional facilitation, language access/translation
 - Governance: Charters, co-leads, steering committees, stakeholders and their roles
- **Sharing power**
 - Establish clear public participation and decision-making expectations (e.g., IAP2 Spectrum)
 - Consider opportunities, like **participatory** agenda setting, budgeting, etc
- **Resources**
 - Seek to understand needs/barriers to public participation or agency involvement
 - Needs for communities (e.g., Stipends? Internet access or technology?)
 - Needs for implementing/stakeholder agencies (PY, \$, priority/expectations)

Capacity Building

- **Filling Knowledge Gaps**

- Is everyone equipped to contribute within the partnership? At the necessary level? 'Speaking the same language?'
- **Bi-directional exchange:** Community \leftrightarrow Government
 - **Community:** Community data, history, lived experience
 - **Government:** Data, protocols, science, policy, authority, etc.
- What gaps need to be filled? Cross-training needs/opportunities?
 - Community-led tours to better understand history and priorities
 - Train for community engagement and common-language communication
 - Racial equity, Civil Rights, Environmental Justice, and Collaborative Problem-Solving
 - Knowledge of public process and agency authorities/responsibilities
 - Fundamental data, science, protocols, terminology

- **Improving transparency, accessibility and participation**

- Public information systems or databases (i.e., needed information & where it will reside)
- Equip communities to access, interpret, and use information in a public process

- **Resources:** Consider capacity-building grants (e.g., Community Air Grants)

Regulatory Authorities

- **Work to get the right people/authority to the table**
 - Lack-of-authority problems exist in communities
 - For example, land use is often at the center of air quality issues, but falls outside air quality agency authority
 - However, the public sees us collectively as 'government'
 - 'Not my problem' can propagate public lack of trust in all of us throughout a community (especially if there's history of inaction or conflict)
 - Prioritize building cross-agency relationships with routine communications to seek solutions and support the community together
 - Anti-idling signs/ordinances
 - Q&A on permitting stationary sources
 - Scale of needed/desired participation can stretch current resources
 - Convening roles for leaders can be very valuable (executives, appointed Board members)

Understanding the Community

- **Bring it all together to address shared goals**
 - Collaborative Partnerships, Capacity, and Authority
 - Resources and funding for
 - Capacity-building
 - Implementation
 - Incentives, including consideration of community-identified projects
<https://ww2.arb.ca.gov/our-work/programs/community-air-protection-incentives>
 - A clear path for implementation (e.g., Blueprint, Charters, CAMP, CERP)
 - Expectations
 - Roles/responsibilities
 - Approval/revision process
 - Progress tracking
